TP-2100 Aluminum alloy seat cushion for grandstand chairs

定制型看台椅铝合金坐垫

The high-strength aluminum alloy profiles are mechanically connected with high quality and environmental friendliness, improving reliability and safety. Moreover, the profiles can be recycled. The backrest and seat are designed in accordance with ergonomic requirements, providing a good sense of comfort. The multi-layer spraying process on the surface of the aluminum alloy ensures suitability for all-weather outdoor use, and the spraying thickness meets the requirements of international standards. Installation and disassembly are convenient.

优质环保的高强度铝合金型材机械连接，提高可靠性和安全性，且型材可以回收利用靠背和座椅按人体工程学要求设计，舒适感好。铝合金表面多层喷涂工艺确保适合户外全天候使用，喷涂厚度达到国际标准要求安装和拆卸方便。

LTCS SERIES

Professional Sports Stadium Lights

LTCS-360W/460W/560W

Product features

Adopting a monolithic PC lens and a matrix arrangement design, it offers high luminous efficiency output.

The professional light distribution design for the outdoor tennis courts with double-sided lighting installation matching can effectively enhance the utilization rate of light and minimize the external spillage. The color rendering index is selectable from 70 to 90, ensuring that athletes and balls on the court are clearly visible.

Integrated molding, the lamp body combines with an aviation-grade aluminum alloy finned heat dissipation structure to achieve IP66 protection and efficient heat dissipation.

The hinge-type power supply sealed cover design enables instantaneous power startup, with a power factor of over 0.98, high power supply efficiency, and safety and reliability. The IP66 protection level, waterproof structure design + high-resistance wire silicone waterproof ring design, provide dual protection and are safer.

Adjustable angle design, the adjustable angle bracket with scale identification allows for arbitrary angle adjustment of the light projection direction.

Lamp surface treatment: The lamp body heat sink adopts electrostatic powder spraying, which is resistant to high temperatures and has good weather resistance.

It is widely applicable to places requiring sports light projection illumination such as tennis courts, football fields, basketball courts, badminton courts, and indoor gymnasiums.
